

● **DESCRIPTION.**

It is manufactured according to **UNE EN 749 regulation** and designed for be installed in any exterior surface.

Structurally, it is formed by the frame and the stabilization and abatement system.

The frame is composed of a square crossbar and two square posts leaving inside measures of (3x2) meters. At the back they have rods to hold the net. Finally, a galvanized treatment is given.

The stabilizer system is composed on the one hand of lateral supports (arches) rigidized with a tube at the top and, on the other hand, of the rectangular base with rods to hold the net, and 4 anti-overturn sheets, all of them, joined to the frame trough screws. In this case, it is given a zinc treatment.

All elements except the frame and the base are rounded to avoid unnecessary physical hazards.

In this way, it can be said that it is a stable, rigid and durable product in the face of demanding and adverse sports or weather conditions.

Ref.	Finish	Dimensions (m)	Peso (Kg)
EBM003	Fully painted (without stickers)	1 bag of 0,15x2,08x3,16	79
		1 bag of 0,08x1,00x3,16	
		1 bag of 0,13x3,01x0,98
