

- DESCRIPTION.**

This product has been designed to roll and unroll every kind of sports and protective coatings with a sportive or public function; up to 40 meters with 15 cm thickness. Ideal for gyms and sports centers.

The structure, with great resistance, counts with a simple manual action mechanism to roll the coating in an easy way with the minimum effort, because of on the two sides of the central edge it has two ball bearings for high loads what facilitates its displacement.

When the mechanism is actioned, the coating rolls up over the superior main tube without impediments thanks to other tube situated in the inferior front part that rolls solidarity to the main tube. This assistance tube has two circular stops to ensure that the coating is rolled perfectly centered.

In addition, the cart is wheeled. The two back wheels are of brake.

100% Polyester (Color to choose)

Ref.	Max.Wide (m)	Dimensions (m)	Weight (Kg.)
EF064	5,00	1 bag of 5,75x0,84x0,75	114,00
