- ANTI-VANDALIC BASKETBALL-MINIBASKETBALL TRIPLE BASKET HOOP.

The **ANTI-VANDALIC BASKET-MINIBASKET TRIPLE BASKET HOOPS**, are made according to the guideline, and are designed to be able to be installed outdoors obtaining 3 different game places with an only post.

They are made fundamentally of:

- Structure and anchorage to the ground.
- The frame stabilization system.
- Frame (and accesories)

In order to constantly improve the quality of our products, Euronix reserves the right to modify any of the technical characteristics.

○ **Structure and anchorage to the ground.**

It is composed by round tube profiles joined through some reinforcement squares that gives the consistence to the equipment. All profiles are mechanized by laser, so the correctly disposition of the elements is guaranteed in every moment.

The central post reaches the foundation through an underground anchor plate threaded in an underground fastener as well.

The frames are joined to the central post by three arms with a 120° difference.

In addition, a galvanized treatment is given to make it resistant to adverse weather conditions.

○ **Frame stabilization system.**

The basket frame is fully established by two stiffeners made of a pair of tubes that joins the structure with the frame, guaranteeing 100% the straightness of the board, obtaining the desired perpendicularity with respect to the ground.

○ **Frame.**

The panel is metallic with a 1200x900mm American look, made with steel plates which have strong anticorrosive properties given by the sealed zinc treatment, and it has an anti-vandalic fix rim.

It has a design personalized by Euronix, so it is a totally exclusive product.

○ **Materials.**

Element	Specification
Profiles / Plates / Frame	S235 JR y S275 JR Steel
Screws	Zinc (Zn) Quality 8.8

Ref.	Finish	Dimensions (m)	Weight (Kg.)
EB033	Galvanized	1 bag of 1,70x2,90x1,80	172.94
		1 bag of 1,20x1,00x0,50
