

- **DESCRIPTION.**

The soccer goal is made according to the **UNE EN 748:2004** guideline (**Type 1**), in this way, it is **6 m long and 2 m high**, measured internally. Moreover, it can be installed on whatever surface as the posts are embedded 400 mm in the ground.

The goal frame is formed by a crossbar and two posts manufactured with 90 mm diameter aluminum profiles, which guarantee the resistance of the structure due to the interior ribbing because of being made of extrusion.

The net is hooked on frame clamping hooks embedded in a groove that has also created that extrusion process and then is pulled by two 3 m back posts that incorporate a pulley for the tensioning rope.

Ref.	Finish	Dimensions (m)	Weight (Kg)
EFPA001	Zinc	1 bag of 6,30x0,30x0,10	47,26
