

- DESCRIPTION.**

The soccer goal is made according to the **UNE EN 748:2004** guideline, in this way, it is **5 m long and 2 m tall**, measured internally. Moreover, it can be installed on whatever surface.

The goal frame is formed by a crossbar and two posts manufactured with 90 mm diameter aluminum profiles, which guarantee the resistance of the structure due to the interior ribbing because of being made of extrusion. The base of the goal is metallic as the side stiffeners (arches).

The net is hooked on frame clamping hooks embedded in a groove that has also created that extrusion process and at the metallic base.

Ref.	Finish	Dimensions (m)	Weight (Kg)
EFPA014	Zinc	1 bag of 5,30x0,30x0,20	55,50
		1 bag of 2,00x1,00x0,30
